PROFESSIONAL SUMMARY

MCA graduate and Backend Developer with hands-on experience in PHP, Laravel, NestJS, MySQL, REST APIs, and database-driven web applications. Experienced in developing real-world applications during a 6-month backend development internship and subsequent professional work, including textile workflow, cricket prediction, inventory management, and service-based platforms. Also independently developing products including a wallpaper platform, web utilities toolkit, AI personal assistant, and architecture portfolio website. Interested in backend development, API development, AI applications, and building scalable real-world products.

TECHNICAL SKILLS

Backend Development: PHP, Laravel, NestJS, C#, ASP.NET
Database: MySQL, SQL Server, XAMPP
Web: HTML, CSS, JavaScript
API Development: REST APIs, API Development, API Integration
Tools: Visual Studio Code, Visual Studio, Postman, Git/GitHub, Android Studio
Concepts: OOP, MVC Architecture, CRUD, Authentication, Database Management

WORK EXPERIENCE

Coding House — Software Developer

- Developed and maintained web applications using PHP and Laravel.
- Worked on backend functionality, database operations, CRUD modules, business workflows, and API-driven features.
- Developed SiliconMeditech, an inventory management website using PHP, Laravel, and MySQL.
- Worked on multiple BondCleaner service-based websites using PHP.
- Debugged, improved, and maintained application functionality based on project requirements.

SiliconMeditech — Inventory Management Website

Tech Stack: PHP, Laravel, MySQL

- Developed backend functionality and database-driven modules for an inventory management platform.
- Implemented business logic, CRUD operations, and management workflows.

BondCleaner — Service-Based Websites

Tech Stack: PHP, MySQL

- Developed and maintained service-based websites using PHP.
- Worked on backend functionality, database operations, and project-specific website modules.

INTERNSHIP EXPERIENCE

Coding House — Backend Developer Intern | *6 Months*

DigiTextile — Textile Workflow Management System

Tech Stack: PHP, MySQL, REST APIs

- Worked as a Backend Developer on a textile workflow management system.
- Developed and maintained backend functionality, APIs, database operations, and business workflows.
- Worked with MySQL database structures and backend data processing.

CrickReward — Cricket Prediction & Rewards Application

Tech Stack: NestJS, TypeScript, MySQL, REST APIs

- Worked as a Backend Developer on a cricket prediction and rewards application.
- Developed backend functionality using NestJS and worked with APIs, database operations, and business logic.
- Worked on prediction, reward, wallet, and application workflow-related backend functionality.
- Assisted in testing, debugging, and improving backend application features.

PERSONAL PRODUCTS & PROJECTS

WallVibe — Wallpaper Platform (https://www.wallvibe.co.in)

Tech Stack: PHP / Laravel, MySQL

- Built and maintained a wallpaper platform for browsing and downloading wallpapers across multiple categories.
- Developed wallpaper browsing, category, detail, download, and content management functionality.
- Implemented database-driven content structures and advertising-based monetization around downloads.
- Focused on responsive UI, SEO, performance, and user experience.

Website Tools — Online Web Utilities Platform

Tech Stack: PHP / Laravel, JavaScript

- Built a collection of browser-based utilities for image, PDF, developer, and calculation use cases.
- Includes PDF to Image, Image to PDF, Image Upscale, Image Downscale, Image Converter, EMI Calculator, JSON Formatter, and Base64 Encoder.
- Designed reusable functionality for multiple utilities with a simple and fast user experience.

Jarvis AI — Personal AI Assistant

Tech Stack: AI / Backend / Web Application

- Currently developing a personal AI assistant designed to support daily activities, information, routines, and productivity.
- Working on conversational interaction, personalized assistance, automation, and AI integration.
- Status: In Development.

Sidhatva Design — Architecture Portfolio Website

Tech Stack: Next.js, React, TypeScript

- Currently developing a premium architecture portfolio website for showcasing architecture and design projects.
- Building interactive project presentations, animations, responsive layouts, and visual storytelling.
- Status: In Development.

ACADEMIC PROJECTS

Foodies — Online Food Service Website

Tech Stack: ASP.NET, C#, SQL Server

- Developed an online food ordering platform with menu browsing, order placement, payment functionality, and admin management.
- Implemented modules for managing users, menus, and orders.

Homies — Hotel Management System

Tech Stack: Laravel, PHP, MySQL

- Developed a hotel management system with room booking, payments, reviews, and user management.
- Implemented admin functionality for rooms, bookings, feedback, and website content.

EDUCATION

Master of Computer Applications (MCA) — Sarvajanik University, Surat | 2024 – 2026
Bachelor of Computer Applications (BCA) — Vivekanand College, VNSGU, Surat | 2021 – 2024
Higher Secondary (12th) — Swaminarayan School, Surat | 2021
Secondary (10th) — Swaminarayan School, Surat | 2019

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati
Interests: Backend Development, API Development, AI Applications, SaaS Products, Web Applications
